SeaTac, WA 98188

The City of SeaTac is currently designing the Connecting 28th/24th Avenue South Project to extend 28th Avenue South from South 200th Street south to South 208th Street, joining at the existing terminus of 24th Avenue South. The new roadway segment will provide four general purpose lanes, left turn pockets, a shared use path on both sides, curb, gutter, stormwater collection and treatment facilities, retaining walls, street lighting, signalization, channelization, landscaping, utilities, and undergrounding of utilities. This project provides a vital and direct intermodal connection between the SeaTac Regional Growth Center, Des Moines, Seattle-Tacoma International Airport, the future Angle Lake Light Rail Station at South 200th Street, among other adjacent developable properties, and will be forward compatible with the SR 509 Extension Project. Construction is scheduled to begin in Summer 2015.

Drop-in any time during the Open House to see displays of the proposed design and meet with City staff about the project. If you are unable to attend, information shown at the Open House will be available on the City's project website within a week after the Open House date. Or you may contact the Project Manager for more information. This notice is available on the City's website and can be translated into five different languages. Please contact the Project Manager if interpreter assistance is required at the Open House. We look forward to seeing and hearing from you!
